Compliance Confirmation for PFAS (Per- and Polyfluorinated Chemicals)

To our customers

This declaration concerns printed circuit boards (PCBs) supplied by STARTEAM GLOBAL

Based on the current information available from our suppliers and internal product knowledge, we hereby confirm that the PCBs supplied by us do not intentionally contain per- and polyfluoroalkyl substances (PFAS). This statement applies to standard PCB products unless otherwise agreed in the product specification.

PFAS may only be present if the customer has explicitly requested or approved PFAS-containing base materials, such as PTFE-based laminates for high-frequency applications. In such cases, the use of these materials is disclosed in the relevant product documentation.

This declaration is made to the best of our knowledge and based on information provided by our suppliers. It does not constitute a warranty beyond the agreed product specification or applicable legal requirements.

Scope

- Unpopulated printed circuit boards (PCBs)
- Standard laminate materials unless otherwise specified
- Product-specific deviations are only valid if stated in the relevant documentation
